

**'MAF aircraft fly all sorts of things  
To help people out,' Mike said.  
'This Advent, let's build a list of them  
All the way from A to Z.'**

R is for radio and S is for solar,  
Exciting technological advances.  
For those living far from power or phones,  
They really improve circumstances.

The highlands of Papua New Guinea  
Was the friends' next destination,  
To meet the technology experts  
Who help this remote location.

MAF's team was waiting on the runway  
Beside a huge pile of kit.  
They loaded it on to Mike's aircraft,  
But it wasn't an easy fit.

First, there was a radio mast  
For a village with no telephone.  
With a radio, they could call for help,  
And would no longer be on their own.

There were also some solar panels  
To convert the rays of the sun  
Into much needed electricity  
To help lots of gadgets run.

The cargo was stowed and the team climbed  
on board,  
Mike's plane was soon in the air.  
It was good that technology could be used  
To show God's love and care.

**Radio and solar are just some of the things  
That MAF flies through the skies.  
Join us tomorrow for the next letter,  
And another exciting surprise.**
