

**'MAF aircraft fly all sorts of things  
To help people out,' Mike said.  
'This Advent, let's build a list of them  
All the way from A to Z.'**

V is for vaccines that help keep us safe  
From all sorts of disease and infection.  
Even those who aren't near a doctor  
Still need to have their injection.

The Democratic Republic of Congo  
Was the next stop for our good friends to make,  
With an important cargo of vaccines  
To help with a measles outbreak.

Mike loaded the cargo of vaccines  
Carefully into the aircraft's hold.

They were packed into special ice boxes  
In order to keep them cold.

Their destination was Lisala  
Where a large crowd calmly waited.  
They were very close to the airstrip  
Where the local clinic was located.

Some of the children were worried  
About having to have an injection,  
So Mike and Foxtrot calmed them down.  
It was worth it for measles protection.

**Vaccines are just one of the things  
That MAF flies through the skies.  
Join us tomorrow for the next letter,  
And another exciting surprise.**
